# Letter from the Director

Dear District Residents and Partners,

I am pleased to share the Department of Behavioral Health's (DBH) second annual report that measures and monitors our progress during Fiscal Year 2021 to provide public behavioral health services that improve the behavioral health of District residents.

The report includes data on 10 Key Performance Indicators (KPIs) on services delivered by DBH-certified, community-based providers that identify achievements and areas for improvement. As with the FY 2020 report, data are reported for the behavioral health care system overall and for each provider that offers the service.

During FY 21, DBH providers met or nearly met performance targets for eight, or 80 percent, of the KPIs. On a system level, provider performance improved on five of the seven KPIs based on FY 20 and FY 21 data. The highest performance was in timely access to mental health care and the greatest improvement was in continued care for substance use disorders after residential treatment. This progress represents the focused attention and collaboration by DBH and providers to address issues reflected in the FY 20 report.

Of note, this report covers data collected during the COVID-19 public health emergency which brought new challenges to maintaining access to services and responding to new demands for behavioral health care.

I extend my appreciation to providers, and most of all, to residents who work to address their behavioral health challenges and sustain recovery. With their ongoing feedback and the collaborative efforts of our government and community partners, peers, and advocates, we will use this performance report to support decision making that advances equitable, whole person care and allows all District residents to achieve their optimum health.

Kindest Regards,

**Barbara J. Bazron, Ph.D.**

Director, Department of Behavioral Health

# DBH Report on Provider Performance

## Overview

The District of Columbia Department of Behavioral Health (DBH) provides prevention, intervention, treatment, and recovery services and supports for children, youth, and adults with mental and/or substance use disorders (SUDs) including emergency psychiatric care and community-based outpatient and residential services. DBH serves consumers, clients, and their families through a network of community-based providers and unique government-delivered services.

DBH is annually required by the Mayor's office to identify Key Performance Indicators (KPIs) to measure and assess progress in improving behavioral health services and outcomes across the District. For Fiscal Year (FY) 2021 (October 1, 2020 through September 30, 2021), performance data on 21 KPIs were reported to the Mayor's office in January 2022 (see DBH's Complete Agency Performance Report in Additional Resources). Of the 21 KPIs, 10 KPIs focus on services delivered by DBH-certified, community-based providers. The other 11 KPIs measure services/activities that are primarily the responsibility of DBH staff.

The DBH report, *Measuring Provider Performance: Building a stronger system of behavioral health care*, FY 21 summarizes individual provider- and system-level (i.e., data across all providers) performance on behavioral health care services provided to children, youth, and adults during FY 21. This report includes three KPIs new to DBH's reporting in FY 21: *Behavioral Health Satisfaction Survey – Access Domain*, *SUD Step Down: Withdrawal Management*, and *SUD Re-entry*. The report builds on the FY 20 report on the same topic and compares FY 20 and FY 21 performance, where available.

The intent of this report is to provide data that DBH and stakeholders (i.e., providers, consumers, clients, advocates, policymakers) can use to drive improvements in timely access to appropriate behavioral health services. DBH plans to release additional reports to enable monitoring of provider performance over time.

10  
KPIs

72  
Providers

DBH used **10** Key Performance Indicators (KPIs) to assess the performance of **72** DBH-certified, community-based behavioral health providers that serve children, youth, and adults with mental health and/or substance use disorders

# DBH System Performance on KPIs

**Note:** \* A lower rate indicates better performance for the SUD Re-entry KPI. System performance includes individuals served by a DBH-certified provider or operated program.

**Source:** DBH analysis as of 1/27/2022.

At the system level, DBH **met or nearly met** its performance targets for eight of the ten indicators

DBH **exceeded** its performance targets for the *Timely Service - Adult Enrollment/Transfer*, *SUD Step-down: Withdrawal Management*, and *SUD Re-entry KPIs*

The *Timely Service - Post-Psychiatric Hospital Discharge* indicator has the **greatest room for improvement**, with a 21 percentage-point difference between current performance and the target

# DBH System Performance on KPIs: Change Over Time

DBH system performance **improved** between FY 20 and FY 21 on **5 of 7** KPIs with available data in both FYs

**All 5** KPIs that increased between the FYs **increased by at least 4 percentage points**

The *SUD Step-down: Residential* indicator had the **greatest increase in performance** between FY 20 and FY 21, with a 14 percentage-point increase

**Note:** \* A lower rate indicates better performance for the SUD Re-entry KPI. N/A: No data available for DBH-certified providers in FY 20. System performance includes individuals served by a DBH-certified provider or operated program.

**Source:** DBH analysis as of 1/27/2022.

# Summary of DBH System Performance on KPIs

Key Performance Indicator	All Provider KPI		Mental Health Provider KPIs				SUD Provider KPIs			
	Behavioral Health Satisfaction Survey – Access Domain	Behavioral Health Satisfaction Survey - Person-Centered Planning Domain	Timely Service - Adult Enrollment/ Transfer	Timely Service - Children Enrollment/ Transfer	Timely Service – Post-Psychiatric Hospital Discharge	Child Functional Assessment Change Over Time	Medication Assisted Treatment: Retention Rate	SUD Step-Down: Residential	SUD Step-Down: Withdrawal Management	SUD Re-entry
DBH Provider	Performance target (80%)	Performance target (80%)	Performance target (85%)	Performance target (85%)	Performance target (70%)	Performance target (80%)	Performance target (90%)	Performance target (50%)	Performance target (50%)	Performance target (25%)
DBH System Performance	–	–	✓	–	✗	✗	–	–	✓	✓
Change in Performance: FY 20 to FY 21	N/A	◆	▲	▲	▲	▲	◆	▲	N/A	New KPI for FY 21

Far Below Performance Target  
(>10 percentage points of target)

Near Performance Target  
(within 10 percentage points of target)

Met or Exceeded Target

Increase  
(≥4-point increase from FY 20)

Decrease  
(≥4-point decrease from FY 20)

Little-to-no-Change  
(≤ 3-point difference from FY 20)

N/A: Not applicable; not a new KPI but no data available for DBH-certified providers in FY 20

**Notes:** System performance includes individuals served by a DBH-certified provider or operated program.

**Source:** DBH analysis as of 1/27/2022.

# Provider Performance at a Glance

In FY 21, DBH providers **met 3** out of **10** and **nearly met 5** out of **10** KPI performance targets.

## Timely Service - Post-Psychiatric Hospital Discharge:

**18 of 43** providers (42%) **nearly met or exceeded** the DBH performance target of 70%; and

**15 of 35** providers (43%) **increased performance** by at least **4 percentage points** from FY 20-FY 21

On a system level, provider performance **improved** on **5 of 7** KPIs with available data in both FY 20 and FY 21

## Child Functional Assessment Change Over Time:

**6 of 13** providers (46%) **nearly met or exceeded** the DBH performance target of 80%; and

**9 of 11** providers (82%) **increased performance** by at least **4 percentage points** from FY 20-FY 21

The KPI assessing the percentage of SUD residential clients who stepped down to a lower level of care had the **greatest increase in performance** of all KPIs between FY 20 and FY 21, from 30% to 44% - a 14 percentage-point increase

## Timely Service - Adult Enrollment/Transfer

Providers had the **highest absolute performance**, with **88%** of adult consumers newly enrolled or transferring in mental health rehabilitative services (MHRS) having their first service within 30 days of enrollment

# Summary of Key Findings

This report on 10 of DBH's FY 21 Key Performance Indicators (KPIs) presents new, publicly-reported provider-specific data on services delivered by DBH-certified, community-based providers. The KPI data are summarized for all providers (referred to as system performance on the tables/charts that follow). Each provider received data on their specific FY 21 KPI performance in April 2022, and system-level performance data were reported to the Executive Office of the Mayor in January 2022 (see DBH's Complete Agency Performance Report in [Additional Resources](#)).

## The findings from this report show that:

DBH-certified, community-based providers met or nearly met the performance targets for eight out of ten indicators. These eight indicators were: consumer/client satisfaction with access to services and patient-centered planning; adult's timely receipt of mental health services; children's timely receipt of mental health services; retention in medication assisted treatment programs; step-down from residential substance use treatment; step-down from withdrawal management substance use treatment; and re-entry into substance use services.

- There is substantial room for improvement on the other two indicators: timely services after an involuntary psychiatric hospitalization and child functional assessment change over time (see [Efforts to Improve Performance](#)).
  - However, both indicators show increases of at least 4 percentage points between FY 20 and FY 21
- On a system level, provider performance improved on 5 of 7 KPIs with available data in both FY 20 and FY 21
  - The *SUD Step-down: Residential* indicator had the greatest increase in performance between FY 20 and FY 21, a 14 percentage-point increase from 30 percent to 44 percent.

The period of data included in this report coincides with the COVID-19 pandemic, which may have impacted the performance seen. DBH will continue to monitor performance on these indicators in subsequent reports.

As efforts to improve reporting on these and other performance indicators take root, DBH and its partners will gain further insight into the factors contributing to the differential performance and deepen our collective understanding of the efforts that can improve behavioral health services and outcomes in the District.

# Report Reference Guide

This reference guide is intended to support the reader in understanding how to review and interpret the information presented in the DBH report, *Measuring Provider Performance: Building a stronger system of behavioral health care*, FY 21. The following provides explanations for key elements found across the report.

## DBH Key Performance Indicators

In 2019, DBH researched national metrics to align their Key Performance Indicators (KPIs) with best practices, which led to the development of the ten KPIs presented in this report. The DBH KPIs are outcome-focused measures used to assess behavioral health services and outcomes across the District. While DBH has a total of 21 KPIs, the 10 indicators included in this report relate to provider performance. Four of the measures focus on mental health services, four focus on substance use disorder (SUD) services, and two focus broadly on behavioral health services (i.e., mental health and SUD). Two KPIs are new for FY 21, one is being publicly reported for the first time, and the definition of one KPI was expanded for FY 21. Definitions of each KPI are available in [Appendix C](#). Information about all 21 KPIs is available in the FY 21 Complete Agency Performance Report which can be found via the [Additional Resources](#).

## Provider Certification

The report presents information on the performance of the providers that were certified by DBH to provide behavioral health services across the District for FY 21. Some of the providers included in this report may no longer be certified. For information about the providers that are no longer certified as of the time of publication, see the [Appendix A](#).

## Provider Type

The District's DBH-certified behavioral health providers provide prevention, intervention, and treatment services to children, youth, and families with mental health and/or SUDs. Seventy-two of these providers are community-based organizations (meaning, are not District-operated). These providers are the focus of this report. Some of these providers offer only mental health services (n=47), SUD services only (n=16), or both mental health and SUD services (n=9). As such, the data for some providers may not be included in all KPIs depending on the services they provide.

For FY 21, DBH has data for at least one of the 10 KPIs included in this report for 65 of the 72 DBH-certified, community-based providers. DBH has no applicable KPI data for the 7 remaining providers, as these providers either did not provide the service in FY 21 that the indicator is being used to assess (e.g., residential SUD services); provided the service but not under a DBH contractual arrangement; and/or had counts below the threshold for public reporting of data in this report (i.e., counts of less than 4 for the mental health and SUD KPIs and less than 10 for the survey indicators).

# Report Reference Guide (cont.)

## Consumers and Clients

While we recognize that others may use different terms, DBH uses the term “consumers” to refer to individuals who received mental health services, and “clients” to refer to individuals who received SUD services. The term “consumers/clients” is used in reference to individuals who received behavioral health services, broadly.

## Assessing Performance

This report assesses provider and system performance on each of 10 KPIs.

- **System performance** includes data from consumers and clients who were assigned to a DBH-certified provider during the reporting year, as well as those who were served by a DBH-operated program.
- **Provider performance** includes data from consumers and clients who were assigned to a DBH-certified provider during the reporting year.

## Performance Targets

DBH established a **performance target** for each KPI. The performance target does not necessarily represent optimal performance but was established for purposes of driving improvement in care delivery in the District. Both system and provider performance are measured in relation to the target:

- A green circle  indicates that the provider and/or system **met or exceeded** the target;
- A yellow circle  indicates that provider and/or system performance was within 10 percentage points of, or “**near**” the target; and
- A red circle  indicates that provider and/or system performance was greater than 10 percentage points of, or “**far below**” the target.

Based on an assessment of FY 20 performance, and research into national performance on similar metrics, DBH revised the performance targets for some KPIs for FY 21.

# Report Reference Guide (cont.)

## Year of Data

The data in this report reflect behavioral health care services provided to children, youth, and adults during Fiscal Year (FY) 2021, October 1, 2020 through September 30, 2021. Comparative information from FY 20 (October 1, 2019 - September 30, 2020) are also presented in the report to measure change over time.

## Report Statistics

In this report, we present provider-level summary data as **means, medians, and percentage rates**. The **mean** represents the average of a set of values. The **median** indicates the value that falls at the midpoint of the data distribution. The **percentage rate** is used to express a proportion in relation to a whole and is calculated as the numerator divided by the denominator multiplied by 100.

In the interest of producing meaningful report statistics, we present these provider-level summary data where there are data for at least four (4) providers, and these providers have counts of at least four (4) in the denominator for all KPIs with three exceptions: a) Medication Assisted Treatment: Retention Rate, given the small number of DBH-certified Opioid Treatment Providers (OTPs); and b) the two Behavioral Health Satisfaction Survey indicators, when a provider had fewer than ten (10) clients in the denominator.

More detailed statistics for each KPI, including provider-specific numerators and denominators, are available via the [Additional Resources](#).

## Change Over Time

Where there are FY 20 and FY 21 data for a given KPI, we measure change over time at both the system and provider levels:

- An upward triangle ▲ indicates an **increase** in performance between FY 20 and FY 21, defined as FY 21 provider and/or system performance that was at least 4 percentage points higher than FY 20 performance;
- A diamond ◆ indicates a **little-to-no-change** in performance between FY 20 and FY 21, defined as FY 21 provider and/or system performance that was within 3 percentage points of FY 20 performance; and
- A downward triangle ▼ indicates a **decrease** in performance between FY 20 and FY 21, defined as FY 21 provider and/or system performance that was at least 4 percentage points lower than FY 20 performance.

These categories were determined based on DBH review and assessment of the data and not based on a statistical test of change.

All data points are rounded to the nearest whole number. Since the percentage point change is calculated on unrounded numbers, for some calculations, percentage point differences do not appear to align with change over time categories due to rounding effects.

# Report Reference Guide (cont.)

## Exclusions

For **mental health and SUD provider KPIs**:

Providers with counts of less than four (4) in the denominator do not meet DBH's threshold for public reporting and were not displayed in provider-specific tables and charts to protect consumer/client privacy. However, data for these providers were included in what we refer to as **overall KPI statistics**, such as the DBH system performance rate, **overall mean**, and **overall median**. When the term "overall" is used, it means that the both the data of providers that met the threshold for public reporting as well as those providers that did not meet the threshold are included in the calculation of the summary statistic.

For the **Behavioral Health Satisfaction Survey KPIs**:

Providers with counts of less than ten (10) in the denominator were excluded from the report because they do not meet the threshold for public reporting of survey data. However, data for these providers were included in the DBH system performance rate. We did not include data for these providers in the calculation of the mean or median to help ensure the integrity of these summary statistics.

Additional KPI-specific exclusions for each indicator are included in [Appendix C](#).

## **Behavioral Health Satisfaction Survey – Access Domain**

Understanding consumer/client satisfaction with the health care system is an important component of moving toward more person-centered care. Evaluating consumer/client satisfaction, along with other domains of care, can provide a more complete understanding of health care quality. This indicator measures the percent of consumers/clients responding to the Behavioral Health Satisfaction Survey who were satisfied with access.

# Behavioral Health Satisfaction Survey - Access Domain

Provider-specific performance on the percent of consumers/clients responding to the Behavioral Health Satisfaction Survey who were satisfied with access, FY 21 (n=68 providers<sup>^</sup>)

**Notes:** Excludes individuals who were not chosen in the random sample. <sup>^</sup>45 providers with fewer than ten consumers/clients responding to the survey have been excluded from this chart because they do not meet the threshold for public reporting of survey data.

**Source:** Behavioral Health Satisfaction Survey data as of 11/10/21.

## **Behavioral Health Satisfaction Survey – Person-Centered Planning Domain**

Understanding consumer/client satisfaction with the health care system is an important component of moving toward more person-centered care. Evaluating consumer/client satisfaction, along with other domains of care, can provide a more complete understanding of health care quality. This indicator measures the percent of consumers/clients responding to the Behavioral Health Satisfaction Survey who were satisfied with the person-centered planning process.

## FY 21 Mean Performance

An average of **71%** of consumers/clients responding to the survey reported satisfaction with the person-centered planning process

## FY 21 Summary of Provider Performance

## Increased Performance Over Time

## **Timely Service – Adult Enrollment/ Transfer**

Supporting consumers/clients through transitions of care is a measure of effective care coordination. Ensuring that consumers/clients receive timely and appropriate services following a care transition can help avoid unnecessary hospitalization or institutionalization, build provider trust, and increase satisfaction with care. This indicator measures the percent of adult (18+) consumers newly-enrolled or transferring in mental health rehabilitative services (MHRS) who had their first service within 30 days of enrollment.

# Timely Service – Adult Enrollment/Transfer

Provider-specific performance on the percent of adult consumers newly-enrolled or transferring in mental health rehabilitative services (MHRS) who had their first service within 30 days of enrollment, FY 21 (n=51 providers<sup>^</sup>)

**Notes:** Excludes adult consumers who were enrolled but not seen, Freestanding Mental Health (FSMH) clinic-only consumers, and claims paid by managed care organizations. <sup>^</sup>Three providers with fewer than four enrollments and transfers in the denominator have been excluded from this chart because they do not meet DBH's threshold for public reporting.

**Source:** DBH analysis of iCAMS & claims data as of 1/27/22. Data were collected from July 1, 2020 to June 30, 2021.

An average of **80%** of adult consumers newly-enrolled or transferring in MHRS had their first service within 30 days of enrollment

## FY 21 Summary of Provider Performance

## Increased Performance Over Time

## **Timely Service – Children Enrollment/ Transfer**

Supporting consumers/clients through transitions of care is a measure of effective care coordination. Ensuring that consumers/clients receive timely and appropriate services following a care transition can help them avoid unnecessary hospitalization or institutionalization, build provider trust, and increase satisfaction with care. Unmet behavioral health care needs among children can have long-term health and social consequences. This indicator measures the percent of child (0-18) consumers newly-enrolled or transferring in mental health rehabilitative services (MHRS) who had their first service within 30 days of enrollment.

# Timely Service – Children Enrollment/Transfer

Provider-specific performance on the percent of child (0-18) consumers newly-enrolled or transferring in mental health rehabilitative services (MHRS) who had their first service within 30 days of enrollment, FY 21 (n=22 providers<sup>^</sup>)

**Notes:** Excludes child consumers who were enrolled but not seen, Freestanding Mental Health (FSMH) clinic-only consumers, and claims paid by managed care organizations. <sup>^</sup>Two providers with fewer than four enrollments and transfers in the denominator have been excluded from this chart because they do not meet DBH's threshold for public reporting.

## **Timely Service – Post-Psychiatric Hospital Discharge**

Improving follow-up and continuity of care for patients hospitalized for psychiatric conditions may lead to reductions in readmissions and improve quality of care for patients. This indicator measures the percent of adult mental health rehabilitative services (MHRS) involuntary psychiatric hospitalizations that had a follow-up service within 30 days.

# Timely Service – Post-Psychiatric Hospital Discharge

Provider-specific performance on the percent of adult mental health rehabilitative services (MHRS) involuntary psychiatric hospitalizations that had a follow-up service within 30 days of discharge, FY 21 (n=51 providers<sup>^</sup>)

**Notes:** The data are for hospitalizations, not unduplicated counts of consumers. A consumer may have been hospitalized more than once during the reporting period. The hospital discharge data are adult MHRS consumers from Washington Hospital Center, Psychiatric Institute of Washington, and/or United Medical Center. <sup>^</sup>Eight providers with fewer than four discharges in the denominator have been excluded from this chart because they do not meet DBH's threshold for public reporting.

**Source:** DBH analysis of iCAMS & claims data as of 1/27/22. Data were collected from July 1, 2020 to June 30, 2021.

## Increased Performance Over Time

**43%** of providers included in this table **increased performance by at least 4 percentage points** between FY 20 and FY 21

## **Child Functional Assessment Change Over Time**

Assessments for children across multiple domains of functioning can help in understanding a child's strengths and care needs, inform decisions about the type and intensity of treatment and level of care, and track outcomes to determine whether a child's functioning improves over time. This indicator measures the percent of children receiving mental health rehabilitative services (MHRS) whose acuity was initially high who had significant improvement in functioning on their most recent functional assessment.

# Child Functional Assessment Change Over Time

Provider-specific performance on the percent of children receiving mental health rehabilitative services (MHRs) whose acuity was initially high who had significant improvement in functioning on their most recent functional assessment, FY 21(n=22 providers^)

**Notes:** Significant improvement is defined as a 20-point or more decrease in total CAFAS/PECFAS score. At least 180 days must elapse between the initial and most recent CAFAS/PECFAS for inclusion in the calculation. Excludes children receiving MHRs with an initial CAFAS/PECFAS score of 70 or lower. ^Nine providers with fewer than four children in the denominator whose initial CAFAS/PECFAS score was 80 or higher and the CAFAS/PECFAS score during the quarter was at least 20 points lower than their initial score have been excluded from this chart because they do not meet DBH's threshold for public reporting.

**Source:** DBH analysis of iCAMS & FAS outcomes data as of 12/15/2021.

## FY 21 Summary of Provider Performance

## Increased Performance Over Time

## Medication Assisted Treatment: Retention Rate

Untreated opioid use disorder (OUD) is associated with significant illness and mortality. Evidence shows that retention in medication assisted treatment (MAT) among people with OUD has been linked to decreased risk of mortality, lower rates of other opioid use, improved social functioning, and better quality of life. This indicator measures the percent of medication assisted treatment clients who were served in two consecutive quarters.

In FY 21, DBH expanded the definition of the Opioid Treatment Program (Methadone): Retention Rate KPI to also include prescription data for buprenorphine and naltrexone (MATs that are used to treat OUD) and renamed the indicator, Medication Assisted Treatment: Retention Rate.

# Medication Assisted Treatment: Retention Rate

Provider-specific performance on the percent of medication assisted treatment clients who were served in two consecutive quarters, FY 21 (n=3 providers)\*

**Notes:** \*The FY 21 DBH system performance rate on the following page includes data for methadone, buprenorphine, and naltrexone clients. As DBH does not certify prescribers of buprenorphine and naltrexone, these providers are not included in the report. Only Opioid Treatment Providers (OTPs) are included in the DBH provider data.

**Source:** DBH analysis of claims data as of 12/13/2021.

Medication Assisted Treatment: Retention Rate was **expanded** from the FY 20 Opioid Treatment Program (Methadone): Retention Rate KPI to also include prescription data for buprenorphine and naltrexone

## FY 21 Summary of Provider Performance

## Increased Performance Over Time

**Notes:** \*The FY 21 DBH system performance rate includes data for methadone, buprenorphine, and naltrexone clients. As DBH does not certify prescribers of buprenorphine and naltrexone, these providers are not included in the report. Only Opioid Treatment Providers (OTPs) are included in the DBH provider data.

**Source:** DBH analysis of claims data as of 12/13/2021.

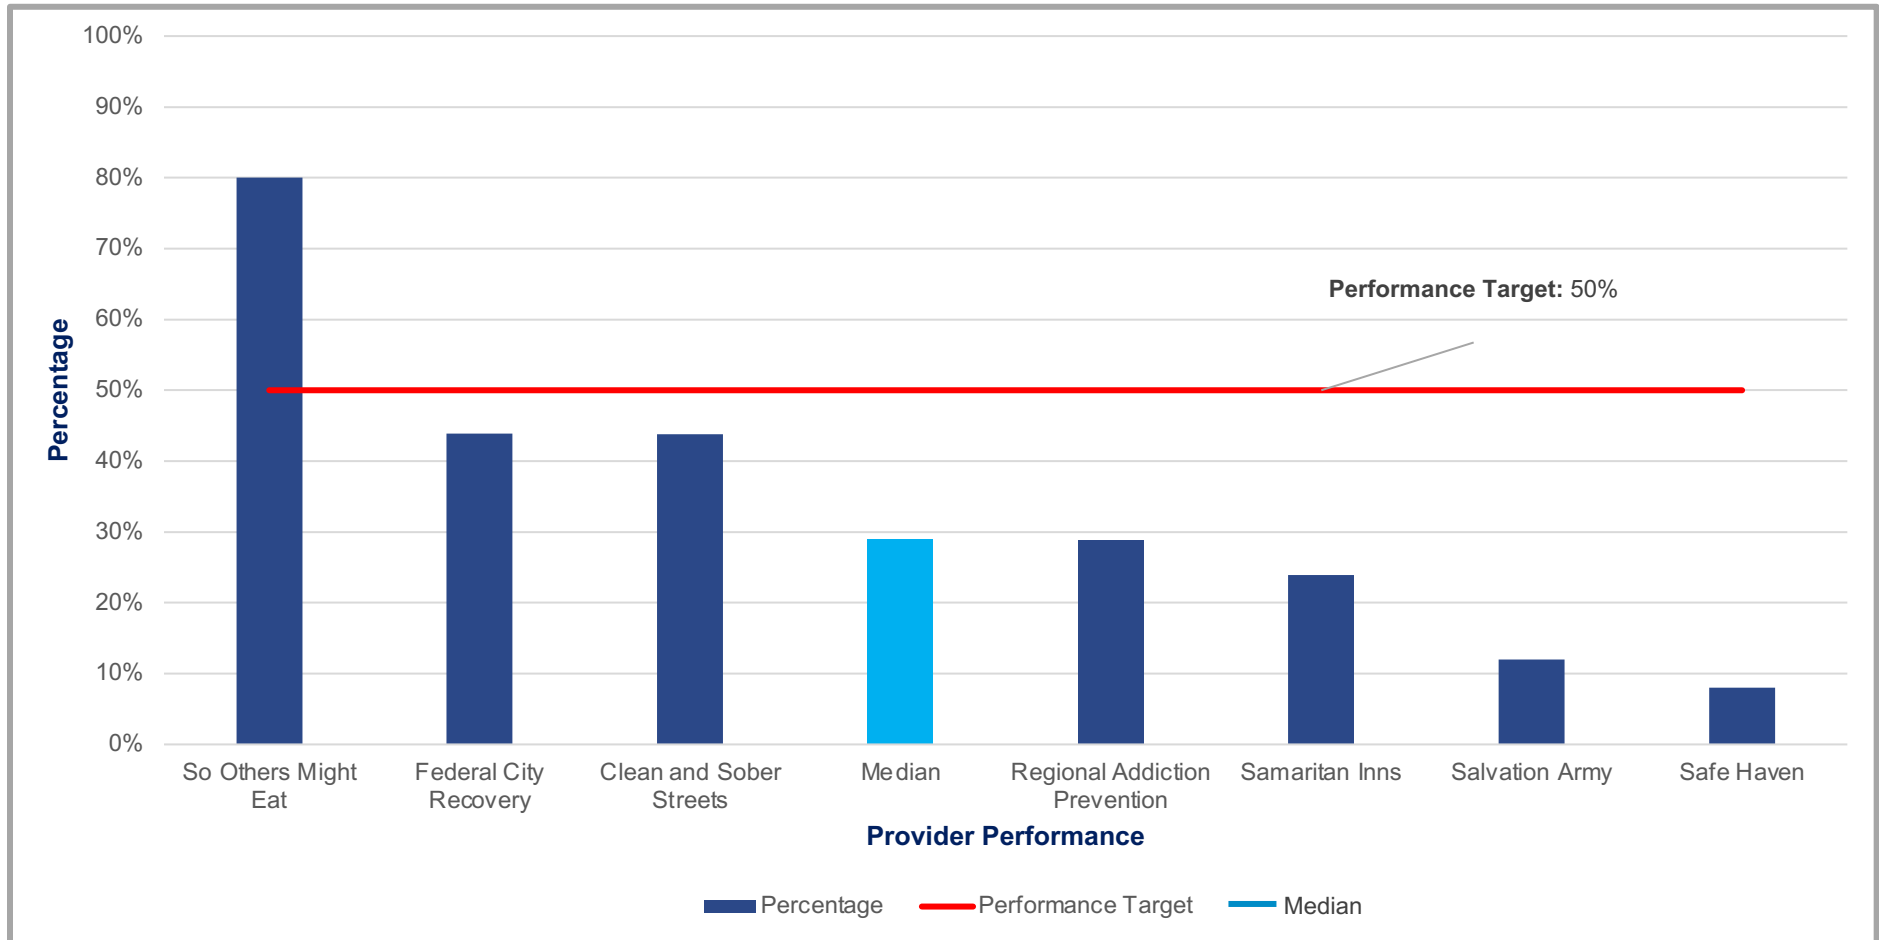

## **SUD Step-Down: Residential**

Treatment for substance use disorder (SUD) includes a flexible continuum of care that allows clients to enter the level most suitable to their needs and step-up or step-down in treatment intensity as their needs change. Stepping down involves less intensive treatment options, allowing clients to reintegrate into the community. This indicator measures the percent of SUD residential clients who stepped down to a lower level of care.

# SUD Step-Down: Residential

Provider-specific performance on the percent of SUD residential clients who stepped down to a lower level of care, FY 21 (n=7 providers)

**Notes:** Excludes clients whose disenrollment reason was either: Client Left Before Completing Treatment; Died; Incarcerated; or Program Decision to Discharge Client for Noncompliance with Program Rules.

**Source:** DBH analysis of DATA/WITS data as of 12/15/21.

## FY 21 Mean Performance

An average of **34%** of SUD residential clients stepped down to a lower level of care

## FY 21 Summary of Provider Performance

**43%** of providers **nearly met or exceeded** the DBH performance target of 50%

## Increased Performance Over Time

**43%** of providers **increased performance by at least 4 percentage points** between FY 20 and FY 21

## **SUD Step-Down: Withdrawal Management**

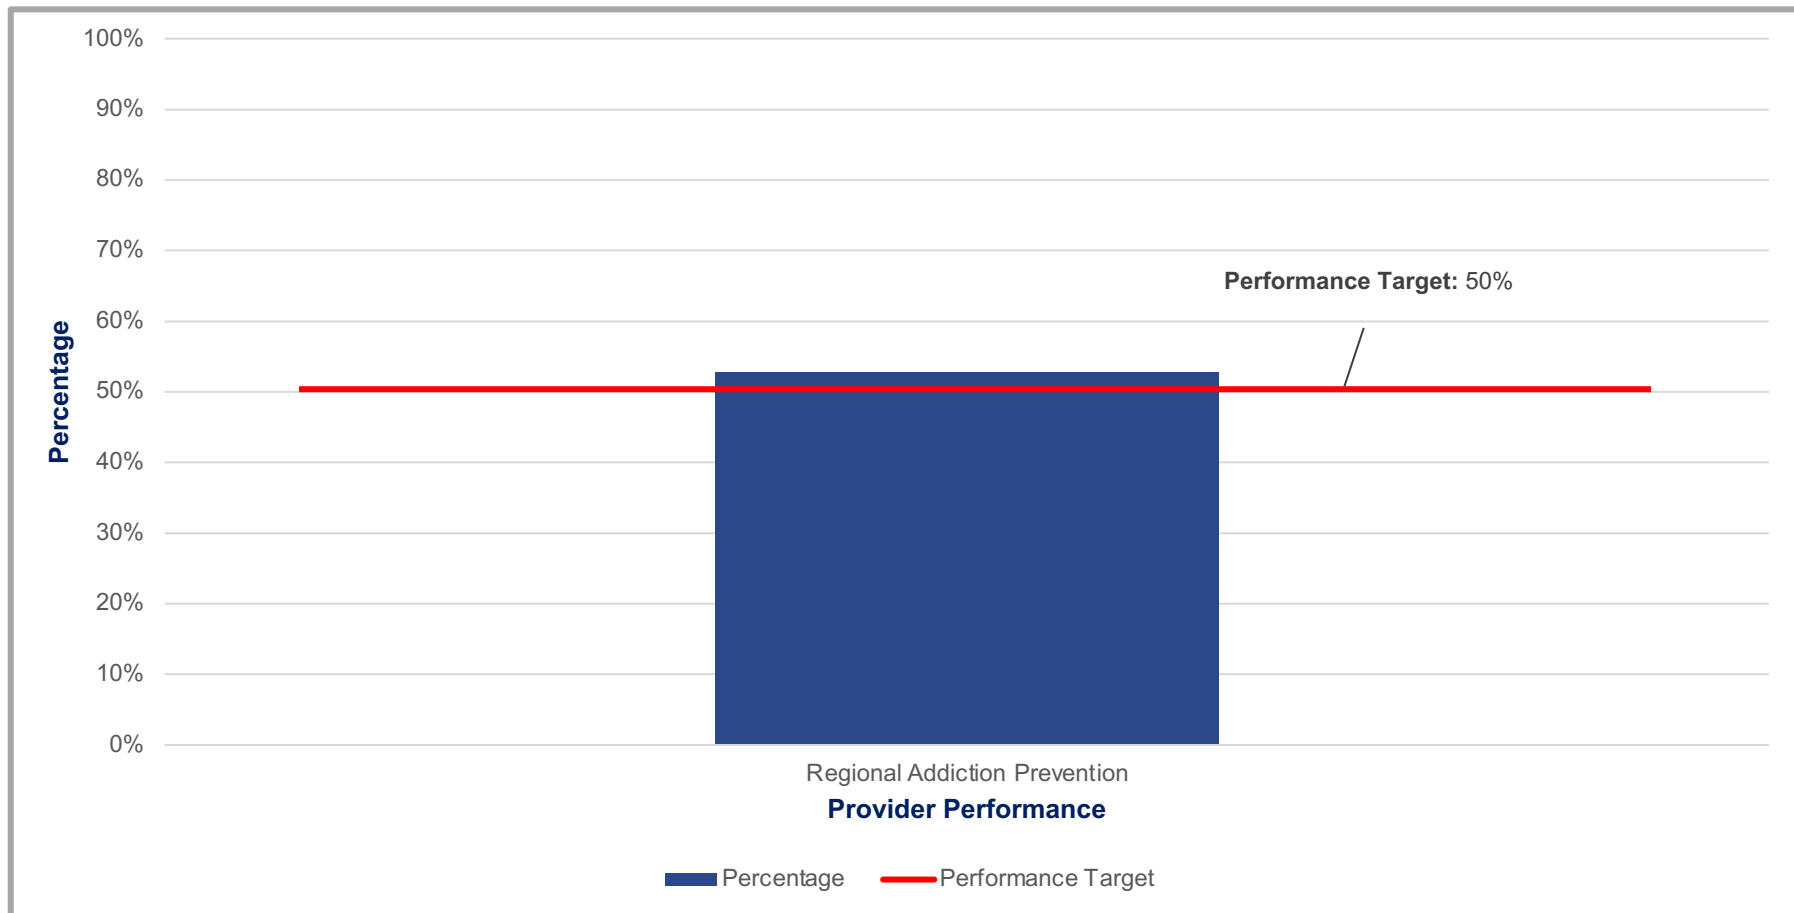

For many clients, withdrawal management is the entry point to substance use disorder (SUD) treatment. Withdrawal management is intended to help individuals safely withdraw from alcohol or other substances. Like other SUD treatment, withdrawal management allows clients to enter at the level most suitable to their needs and step-up or step-down in treatment intensity as their needs change. This indicator measures the percent of SUD withdrawal management clients who stepped down to a lower level of care.

*SUD Step-Down: Withdrawal Management* is being reported in FY 21 for the first time. While it is not a new KPI for FY 21, no data were available for DBH-certified providers in FY 20.

# SUD Step-Down: Withdrawal Management

Provider-specific performance on the percent of SUD withdrawal management clients who stepped down to a lower level of care, FY 21 (n=1 provider)

**Notes:** Excludes clients whose disenrollment reason was either: Client Left Before Completing Treatment; Died; Incarcerated; or Program Decision to Discharge Client for Noncompliance with Program Rules. Please note that DBH contracts with the Psychiatric Institute of Washington (PIW) to provide withdrawal management services, which is licensed by DC Health, but is not a DBH-certified, community-based provider. As such, data for PIW are not included in this report.

**Source:** DBH analysis of DATA/WITS data as of 12/15/2021.

# SUD Step-Down: Withdrawal Management

*SUD Step-Down: Withdrawal Management* is being **reported for the first time** in FY 21. No data were available for DBH-certified providers in FY 20

System and provider-level performance **exceeded** the DBH performance target of 50%

**Notes:** Excludes clients whose disenrollment reason was either: Client Left Before Completing Treatment; Died; Incarcerated; or Program Decision to Discharge Client for Noncompliance with Program Rules. Please note that DBH contracts with the Psychiatric Institute of Washington (PIW) to provide withdrawal management services, which is licensed by DC Health, but is not a DBH-certified, community-based provider. As such, data for PIW are not included in this report.

**Source:** DBH analysis of DATA/WITS data as of 12/15/2021.

## SUD Re-entry

Even after a successful discharge from substance use disorder (SUD) treatment, some clients may re-enter services for SUD treatment. Reasons for re-entry, which is sometimes called a relapse, vary but can include factors such as co-occurring mental health challenges and housing instability. This indicator measures the percent of SUD clients who were successfully discharged and re-entered services within 90 days.

Provider-specific performance on the percent of SUD clients who were successfully discharged who re-entered services within 90 days, FY 21 (n=21 providers^)

**Notes:** Excludes clients whose discharge reason was either: Client Left Before Completing Treatment; Died; Incarcerated; or Program Decision to Discharge Client for Noncompliance with Program Rules. ^Three providers with fewer than four clients in the denominator have been excluded from this chart because they do not meet DBH's threshold for public reporting. **\*A lower rate on this KPI indicates better performance.**

**Source:** DBH analysis of DATA/WITS data as of 12/15/21.

# Efforts to Improve Performance

DBH, working in partnership with providers and stakeholders (e.g., policymakers, consumers/clients, advocacy groups, and other District agencies) seeks to meet the behavioral health needs of all District residents. This report provides a summary of performance on 10 DBH Key Performance Indicators (KPIs) for services provided to children, youth, and adults during FY 2021 (October 1, 2020 - Sept 30, 2021).

DBH met or nearly met performance targets for eight of the 10 KPIs that assess:

- consumer/client satisfaction with the person-centered planning process;
- consumer/client satisfaction with access to services;
- adult's timely receipt of mental health services;
- children's timely receipt of mental health services;
- retention in medication assisted treatment programs;
- step-down from residential substance use treatment;
- step-down from withdrawal management substance use treatment, and;
- re-entry into substance use services.

For the two indicators in which DBH fell short in meeting its performance targets, DBH undertook several efforts to drive improvements in performance. These efforts included sharing DBH-collected data on performance based on provider claims with each DBH-certified provider. Examples of other improvement efforts related to these two KPIs are described below:

- **Timely Service After an Involuntary Psychiatric Hospital Discharge:** DBH actively and continuously engages its mental health providers to coordinate care between levels of care and across the care continuum. DBH hosts a bi-weekly meeting with the providers to provide technical assistance and assist them with data entry into DBH's Electronic Health Record (EHR) to ensure better care coordination. A primary focus of this meeting addresses care coordination challenges that providers experience, as well as offering recommendations and strategies to better engage and retain clients in care. In this meeting, DBH shares the service delivery system's monthly and quarterly outcome data related to this KPI and discuss strategies for how providers can improve their performance.

## Efforts to Improve Performance (cont.)

DBH has also undertaken efforts to improve the quality of data for this KPI, including conducting regular record reviews to identify opportunities for workflow and documentation improvement. The data analysis from the record reviews showed individuals who were ineligible for follow-up services were being included in the KPI calculations. Changes to workflows were implemented to exclude those who lived out-of-jurisdiction or had private insurance. DBH engaged with community hospitals to encourage discharge planning with community providers. DBH worked with community providers to maximize use of the District's Health Information Exchange (HIE) so they would receive electronic notifications when their consumers were discharged. Additionally, DBH researched national performance on similar metrics and decided to change the target for this KPI from 70% to 60% for FY 22.

- **Child Functional Assessment Change Over Time:** DBH has engaged in numerous technical assistance efforts around this indicator. Consumer-level data were shared monthly with providers to identify those whose functional assessments were current, expired, or missing, so that the KPI data would be more complete. DBH met regularly with Community Based Intervention (CBI) providers to discuss compliance with completing functional assessments and children's functional improvements over time. DBH also provided training and technical assistance for providers to better access and utilize outcomes data. DBH developed a survey to obtain provider feedback regarding the perceived effectiveness of the functional assessment tool and its use in clinical practice. DBH will use survey findings to inform future TA efforts. Due to concerns that the current KPI may not allow providers to fully demonstrate improvement on the measure for children, DBH decided to expand the metric in FY 22 to one that shows progress on individual domains rather than on one overall score.

DBH will advance efforts through these and other activities to ensure that all consumers/clients in the District have timely access to appropriate behavioral health services.

# Conclusion

*Measuring Provider Performance: Building a stronger system of behavioral health care*, FY 21, provides provider-specific performance on 10 DBH Key Performance Indicators (KPIs) for services received by children, youth, and adults during FY 21 (October 1, 2020 – Sept 30, 2021). DBH met or nearly met performance targets for eight of the 10 KPIs (80%), but DBH fell short in meeting performance targets for two measures of behavioral health care.

Now with two years of publicly reported data on seven of the KPIs, the report also provides comparative information about how performance on these indicators has changed over time. For example, DBH had increased performance on five of seven KPIs with data available for both FY 20 and FY 21, with all five indicators exhibiting gains of at least four percentage points between the FYs. This includes the two KPIs for which DBH did not meet its performance targets: timely services after an involuntary psychiatric hospital discharge and child functional assessment. Though there is still more work to do, these findings show that DBH's efforts to improve performance highlighted earlier in this report (see [Efforts to Improve Performance](#)) are resulting in progress toward our goals.

It is important to note that the data included in this report include services provided during the public health emergency caused by the COVID-19 pandemic. Data from MHEASURES (see [Additional Resources](#)), show that while there was a two percent decrease in utilization of substance use disorder services, there was a 14 percent increase in the number of DBH consumers/clients receiving community-based mental health services in FY 21, on top of a six percent increase in the prior year, driven primarily by telemedicine services. It is encouraging that DBH-certified providers were able to maintain and, in some cases, expand access to services while both meeting performance targets *and* realizing improvements in care delivery over time during a time in which there were ongoing COVID-related service disruptions.

Using the data in this report and other available tools, DBH will continue building on the progress demonstrated in this report, to build a stronger system of behavioral health care in the District.

# Appendix Tables and Additional Resources

# Appendix A. FY 21 DBH-Certified Community-Based Providers

The table below lists the 72 DBH-certified, community-based mental health (MH) and substance use disorder (SUD) providers in FY 21.

Provider	DBH Certification (MH, SUD, MH/SUD)	Population Served

# Appendix B: Summary of Provider-Specific Performance Across KPIs: Legend and Notes

## Appendix Legend

 Far Below Performance Target (>10 percentage points of target)	 Increase ( $\geq 4$ -point increase from FY 20)
 Near Performance Target (within 10 percentage points of target)	 Decrease ( $\geq 4$ -point decrease from FY 20)
 Met or Exceeded Target	 Little-to-no-Change ( $\leq 3$ -point difference from FY 20)

## Appendix Notes

-- : For the mental health and SUD-focused KPIs, data suppressed due to providers having fewer than 4 consumers/clients in the indicator denominator. For the all-provider KPIs, data suppressed due to providers having fewer than 10 consumers/clients in the indicator denominator.

/ : No data for the provider for FY 20

N/A : Not applicable

N/A<sup>\*</sup>: Not applicable; new KPI for FY 21

N/A<sup>\*</sup>: Not applicable; not a new KPI but no data available for DBH-certified providers in FY 20

N/A<sup>1</sup>: SUD provider, and the KPI is mental health focused

N/A<sup>2</sup>: mental health provider, and the KPI is SUD focused

N/A<sup>3</sup>: provider serves children only and the KPI is adult focused

N/A<sup>4</sup>: provider serves adults only and the KPI is child focused

N/A<sup>5</sup>: not an OTP provider

N/A<sup>6</sup>: not a residential provider

N/A<sup>7</sup>: does not provide this level of care

# Appendix C: KPI Definitions

Indicator	Description	Numerator	Denominator	Exclusions	Data Source
Behavioral Health Satisfaction Survey – Access Domain	Percent of consumers/clients surveyed in the Behavioral Health Satisfaction Survey who were satisfied with access	Number of consumers/clients surveyed in the Behavioral Health Satisfaction Survey who were satisfied with access	Number of consumers/clients who responded to the Behavioral Health Satisfaction Survey survey	Anyone who has not been chosen in the random sample	Behavioral Health Satisfaction Surveys
Behavioral Health Satisfaction Survey - Person-centered Planning Domain	Percent of consumers/clients surveyed in the Behavioral Health Satisfaction Survey who were satisfied with the person-centered planning process	Number of consumers/clients surveyed in the Behavioral Health Satisfaction Survey who were satisfied with the person-centered planning process	Number of consumers/clients who responded to the Behavioral Health Satisfaction Survey survey	Anyone who has not been chosen in the random sample	Behavioral Health Satisfaction Surveys
Timely Service: Adult Enrollment/Transfer	Percent of adult (18+) consumers newly-enrolled or transferring in mental health rehabilitative services (MHRS) who had their first service within 30 days of enrollment	Adult consumers with a paid MHRS fee-for-service claim within 30 days	All enrollments and transfers	Consumers who were enrolled but not seen, Freestanding Mental Health (FSMH) clinic-only consumers, claims paid by MCOs.	iCAMS & claims
Timely Service: Children Enrollment/Transfer	Percent of child (0-18) consumers newly-enrolled or transferring in mental health rehabilitative services (MHRS) who had their first service within 30 days of enrollment	Consumers with a paid MHRS fee-for-service claim within 30 days	All enrollments and transfers	Consumers who were enrolled but not seen, Freestanding Mental Health (FSMH) clinic-only consumers, claims paid by MCOs	iCAMS & claims
Timely Service: Post-Psychiatric Hospital Discharge	Percent of adult Mental Health Rehabilitative Services (MHRS) involuntary psychiatric hospitalizations that had a follow-up service within 30 days	Number of adult discharges from an involuntary psychiatric hospitalization for MHRS consumers who had a paid claim within 30 days	Number of adult discharges from an involuntary psychiatric hospitalization for MHRS consumers	Saint Elizabeths and non-contracted hospitals, children	iCAMS & claims
Child Functional Assessment Change Over Time	Percent of children receiving MHRS services whose acuity was initially high who had significant improvement in functioning on their most recent functional assessment	Number of children whose initial CAFAS/PECFAS score was 80 or higher and the CAFAS/PECFAS score during the quarter was at least 20 points lower than their initial score	Number of children whose initial CAFAS/PECFAS was 80 or higher and who had a CAFAS/PECFAS during the reporting quarter	Children receiving MHRS with an initial CAFAS/PECFAS score of 70 or lower	iCAMS and FAS outcomes

## Appendix C: KPI Definitions (cont.)

Indicator	Description	Numerator	Denominator	Exclusions	Data Source
Medication Assisted Treatment: Retention Rate	Percent of medication assisted treatment (MAT) clients who were served in two consecutive quarters	All clients with a medication assisted treatment (MAT) claim in the previous quarter and the current quarter	All clients with a medication assisted treatment (MAT) claim in the previous quarter	Not Applicable.	Claims
SUD Step-down: Residential	Percent of SUD Residential clients who stepped down to a lower level of care	Clients who had a program enrollment at a lower level of care within 14 days of the successful residential disenrollment	Clients who had a disenrollment reason of either: Completed SUD Treatment with No Substance Use; Completed Treatment with Some Substance Use; or Transfer to CDS Program Within Agency for Continued Services	Clients whose disenrollment reason was either: Client Left Before Completing Treatment; Died; Incarcerated; or Program Decision to Discharge Client for Noncompliance with Program Rules	DATA/WITS
SUD Step-down: Withdrawal Management	Percent of SUD withdrawal management clients who stepped down to a lower level of care	Clients who had a program enrollment at a lower level of care within 14 days of the successful withdrawal disenrollment	Clients who had a disenrollment reason of either: Completed SUD Treatment with No Substance Use; Completed Treatment with Some Substance Use; or Transfer to CDS Program Within Agency for Continued Services	Clients whose disenrollment reason was either: Client Left Before Completing Treatment; Died; Incarcerated; or Program Decision to Discharge Client for Noncompliance with Program Rules	DATA/WITS
SUD Re-entry	Percent of SUD clients who re-entered services within 90 days	Number of clients with a successful discharge who had an intake (AR program enrollment or ARC intake) within 90 days of the discharge date	Number of successful discharges (discharge reason of either: Completed SUD Treatment with No Substance Use; Completed Treatment with Some Substance Use; or Transfer to CDS Program Within Agency for Continued Services)	Clients whose discharge reason was either: Client Left Before Completing Treatment; Died; Incarcerated; or Program Decision to Discharge Client for Noncompliance with Program Rules	DATA/WITS
