Data Disclaimer

The primary source of data extracted and analyzed herein is Avatar, the Saint Elizabeths Hospital's electronic medical record system. Additional data source includes, but is not limited to, the Hospital's Unusual Incident Database and SiteFM. Data reflects information as entered in each system by users. The Office of Statistics and Reporting (OSR) has made reasonable efforts to ensure that data and its accompanying information are as accurate and up-to-date as possible at the time of analysis and publication but does not guarantee the accuracy, reliability, or completeness of data. The OSR is not liable for any misinterpretation or misuse of the data. Use of any information from PRISM must be fully acknowledged and/or cited. Use of PRISM data for anything other than patient care determinations or management of the services provided within the hospital (including external publications, research papers, presentations, etc.) is prohibited without written permission from the Chief Quality and Data Manager Officer at the Saint Elizabeths Hospital.

Key Trends: Admissions, Discharges, Transfers, Census, and Readmissions (1~5)

- Since the spike in admissions in August, the number of admissions has dropped substantially but has not fallen to previous average levels. There was a 38% decrease in September but admissions increased by 6% in October, rising from 38 to 44.
- Three out of five (60%) of the Pre-trial admissions were readmitted patients from a previous episode (re-admissions).
- There was a 70%-30%, male-to-female, proportional split of the census by gender as of the end of October. During October 71% of the admissions were male and 61% of the discharges were males.
- Of the 43 patients discharged in October, 4 were discharged due to the reason "hospitalization was no longer necessary", 35 were discharged by order of the court, 2 were deceased, 1 was discharged home, and 1 was placed as an outpatient.
- In the last 4 months (since June), there has been only 1 30-day readmission. That patient had a Pre-trial legal status.

1. Admissions to SEH

* Number of admissions to SEH inpatient program, including transfers from forensic outpatient to inpatient program.

2. Discharges from SEH

* Number of discharges from SEH inpatient program, including transfers from inpatient to forensic outpatient program.

3. Average Daily Census

* Data above is the daily average number of individuals counted at 11:59 PM every day during each month.

4. Transfers

* Number of inter-unit transfers that occurred during month and number of emergency medical leaves that were initiated during month.

5. 30-Day Readmission Rate

* Percent of discharges that returned to SEH within 30 days of discharges. It does not include those who may have been re-hospitalized at another psychiatric facility. This measure requires 30-day observation following discharge.

** The post-trial denominators (discharges) per month range only between one and six, making the monthly re-admission rate high when there is any. For example, in December 2014, there was only one post-trial discharge, which was readmitted within 30 days. Thus, the 30-day readmission rate for post-trial discharge at that time was 100%.

Key Trends: Unusual Incidents (6~17)

- Risk Management received 188 Unusual Incident (UI) reports in October--more than 16% over September and the most in any month since January.
- No patient or staff were treated at other facilities due to injuries resulting from a UI.
- Totals of the most re-occurring UI categories were: Aggressive Behavior (58), Emergency Involuntary Medication (56), Physical Assaults (43), Psychiatric Emergencies (40), Falls (33).
- The rise in total UIs in October did not directly translate through the severity levels. Although UIs increased by 16%, the actual number of both high and medium severity UIs decreased.
- Patient Injuries were down 41% from September while staff injuries dropped 18%.

6. Unusual Incidents

7. Patient-Involved Unusual Incidents

* The patient UI rate is the number of patient-involved unusual incidents reported for every 1000 inpatient days.

8. Admissions vs. Patient UI Rate

▲ Injury	37	23	29	23	18	24	26	27	23	23	36	25

* These are incident types that are frequently reported. Some incidents may be counted in multiple categories. For example, a physical assault incident that accompanied psychiatric emergency and injury is counted under psychiatric emergency and injury as well as under physical assault. Injury is broadly defined to include any type of injury, regardless of the cause or severity level.

11. Physical Assaults by Severity

Severity

* Any physical assault that accompanies a code 13 or results in extensive injury needing off-unit treatment or transfer to ER is considered to be high severity; any physical assault that causes a minor injury that can be treated on unit is considered to be medium severity; and physical assault events that result in no injury are considered to be low severity.

12. Patient Injuries

	Nov-16	Dec-16	Jan-17	Feb-17	Mar-17	Apr-17	May-17	Jun-17	Jul-17	Aug-17	Sep-17	Oct-17
Total Pts Injured	29	16	21	11	16	10	18	16	14	17	24	14
Major Pt Injuries*	1	1	1	0	0	1	0	1	3	2	4	2
Patient Injury Rate	0.13	0.12	0.12	0.00	0.00	0.13	0.00	0.13	0.38	0.24	0.48	0.24

* Injury is broadly defined to include any type of injuries regardless of the cause or severity level. The total number of patients injured represents all of the reported injuries including minor injuries treated with first aid alone. However, the patient injury rate considers only the number of patient injuries that are required beyond first-aid level treatment based on the NRI definition and the patient injury rate is the number of 'major' patient injuries per every 1000 inpatient days

13. Staff Injuries

* Injury is broadly defined to include any type of injuries regardless of the cause or severity level. The total number of staff injured represents all of the reported staff injuries including minor injuries treated with first aid alone.

14. Patient and Staff Falls

* The patient fall rate is the number of patient falls per every 1000 inpatient days.

15. Percent of Patients Restrained or Secluded

* Percent of unique patients who were restrained at least once and percent of unique patients who were secluded at least once. The denominator includes all individuals who were served in care 1+ day during month.

16. Restraint Hours Rate & Seclusion Hours Rate

* Restraint/Seclusion Hours Rate: Number of hours spent in restraint/seclusion for every 1000 inpatient hours.

**** The duration of each physical hold event is counted as 1 minute as a physical hold is ordered and used only as a temporary intervention that lasts less than a minute to break up any physical conflicts or to administer emergency medications.**

17. Elopements

* Data herein counts the number of unauthorized leaves for any duration that were initiated during month and were recorded in Avatar. The elopement rate is the number of those unauthorized leaves that occurred for every 1000 inpatient days.

Key Trends: Medication Documentation, MV, ADR, and STAT (18~22)

- The average number of Medication Variances (MV) for the last 12 months is 7 occurrences each month. At the same time last year, there were 20 reports per month on average.
- Since the start 2017 the most re-occurring reason for MVs is "IT/System issues." There have been 18 thus far in 2017.
- There were more scheduled medication administrations (109,486) in October than any other month this year and 2.3% more than September, but the missing administrations actually fell from the previous month as they dropped from 367 to 304.
- In October, medications were refused at a rate of 5.80%. For the prior 4 months, the rate had been decreasing at an average of .33% each month.

18. Reported Medication Variance Events

* MV Rate: Number of reported medication variance events that occurred for every 1000 inpatient days.

19. Reported Adverse Drug Reactions

* ADR Rate: Number of reported adverse drug reaction events that occurred for every 1000 inpatient days.

20. Percent of Missing Documentation on Med-Administration

21. Medication Refusal Rate*

* Medication Refusal Rate: the number of refused medication doses divided by the total number of doses scheduled for administration.

22. Number of STAT Events and Individuals Involved

Key Trends: Environment of Care (23)

- Seventy-two percent (72%) of the work orders submitted in October were completed with 3 days.
- Approximately 40% (300) were completed the same day that the work was requested.
- The most requested type of work order involved the ordering of medical supplies (98).

23. Percentage of SiteFM Work Orders Completed within 3 Days

*Data for July'16~Sep'16 is unavailable due to a technical issue with the SiteFM database

Key Trends: Demographics, Legal Status, and Length of Stay (24-25)

- There was a 4% increase in the number of patients 60 years and older and a simultaneous 3% decrease in those under 30 years of age in the census.
- Four of 5 patients under 30 years of age were Pre-trial patients as of October 31st.
- For the second time in the history of the measure, the proportion of forensic pre-trial patients reached 40%, amounting to 113 patients.
- The median Length of Stay (LOS) for all patients was 9 months while the average LOS was 5.7 years—about 8x the median.
- For the last 12 months, the median LOS has been inching closer to the average LOS. In November 2016, the two measures were 1419 days apart, in favor of the average. As of October 31, 2017, only 683 days separates them.

24. Demographics

Trend of Gender Distribution

Trend of Age Distribution

Trend of Legal Status Distribution

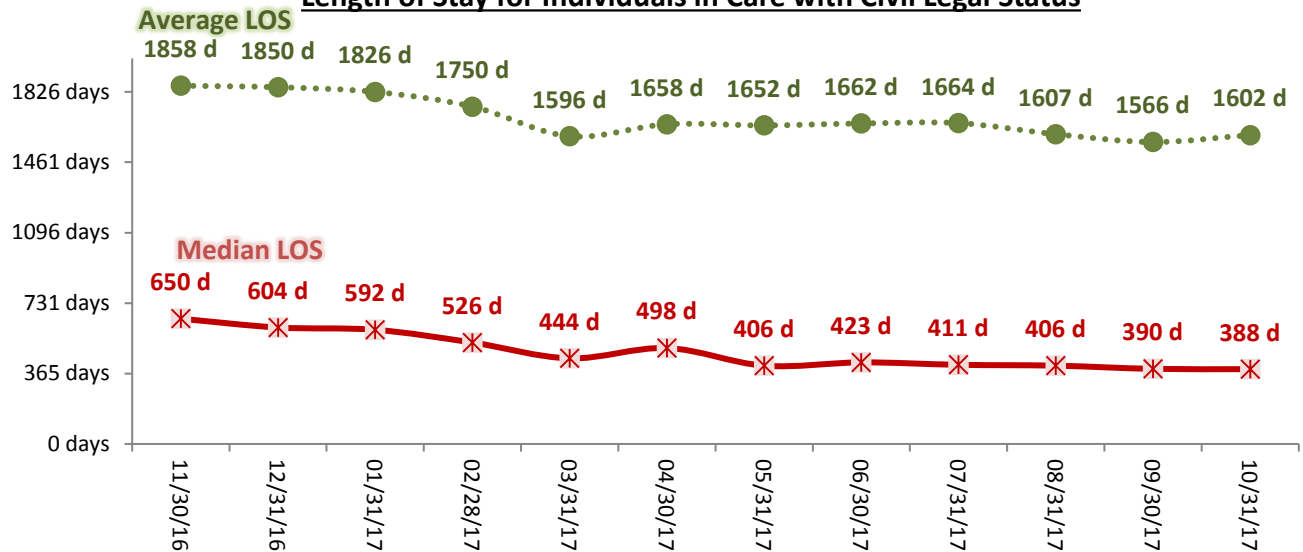

25. Length of Stay

Average and Median Length of Stay for Individuals in Care

Length of Stay for Individuals in Care with Civil Legal Status**Length of Stay for Individuals in Care with Pre-trial Legal Status****Length of Stay for Individuals in Care with Post-trial Legal Status**

* National Public Rate, NASMHPD Research Institute, National Research Institute (NRI), Data as of June 2013, Published in November 2013.

** Numbers may change if any additional UI report is made after the data run date from UI database (around the 15th of the following month); According to the revised UI policy as of November 4, 2013, a medication variance (MV) incident became no longer considered to be an unusual incident, and a medication or vital sign refusal incident is not longer an UI as of May 2014. UI data for the past 12 months in this report has been updated to reflect this change and reanalyzed in order to show the UI trend in consistent logic.

*** Injury is broadly defined to include any type of injuries regardless of the cause or severity level. The total number of patients injured represents all of the reported injuries including minor injuries treated with first aid alone. However, the patient injury rate considers only the number of patient injuries that required beyond first-aid level treatment based on the NRI definition and the patient injury rate is the number of 'major' patient injuries per every 1000 inpatient days

**** One STAT event may involve more than one STAT order for the same patient. Any orders placed within 20 minute timeframe are considered to belong to one STAT event. All STAT order counts are from Pharmacy only..no LABS orders,etc...

* National Public Rate, NASMHPD Research Institute, National Research Institute (NRI), Data as of June 2013, Published in November 2013.

** Restraint data prior to April 2015 includes only mechanical restraints. The Hospital's restraint policy has been revised to consider a physical hold a restraint and data as of April 2015 reflects this change. The duration of each physical hold event is counted as one (1) minute as a physical hold is ordered/used only as a temporary intervention that lasts less than a minute to break up any physical altercations or to administer emergency medications.
