2/15/2012

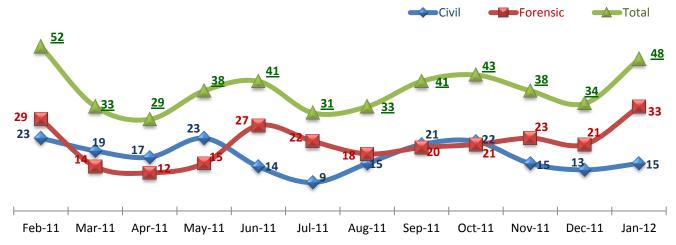

Office of Statistics and Reporting (OSR)

#### 1. Admissions to SEH

<sup>\*</sup> Number of admissions to SEH inpatient program, including transfers from outpatient to inpatient program.

# 2. Discharges from SEH

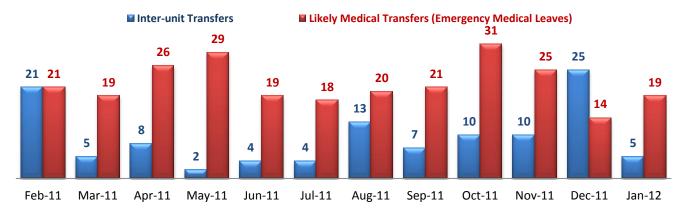

<sup>\*</sup> Number of discharges from SEH inpatient program, including transfers from inpatient to outpatient program.

# 3. Average Daily Census

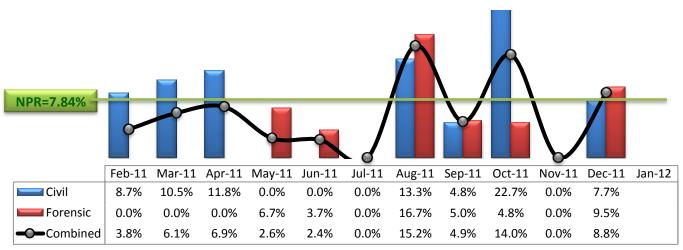

<sup>\*</sup> Data above is the daily average number of individuals counted at 11:59 PM every day during each month.

#### 4. Transfers

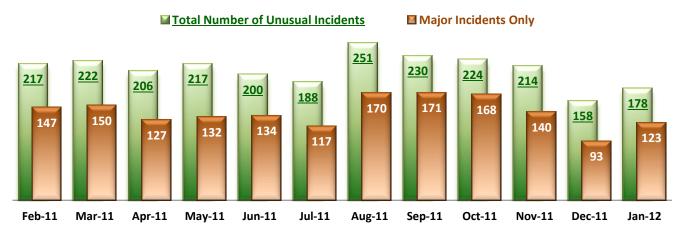

<sup>\*</sup> Number of inter-unit transfers that occurred during month and number of emergency medical leaves that were initiated during month.

#### 5. 30-Day Readmission Rate

<sup>\*</sup> Percent of discharges that returned to SEH within 30 days of discharges. It does not include those who may have been re-hospitalized at another psychiatric facility. This measure requires 30-day observation following discharge.

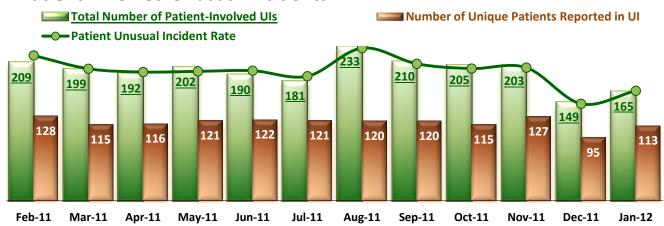

#### 6. Unusual Incidents

<sup>\*</sup> Numbers above represent all types of the unusual incidents (UIs) that were reported to the Risk Manager by PRISM publication date, including those that did not involve any patients.

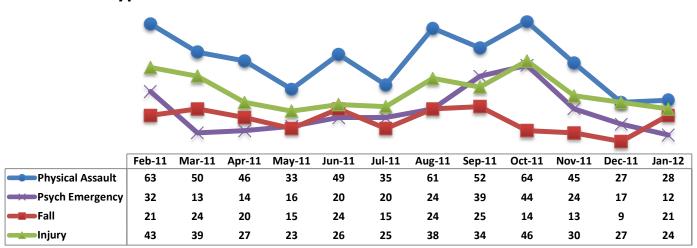

<sup>\*\*</sup> NPR: National Public Rate as of December 2009 published by NASMHPD Research Institute in May 2010.

#### 7. Patient-Involved Unusual Incidents

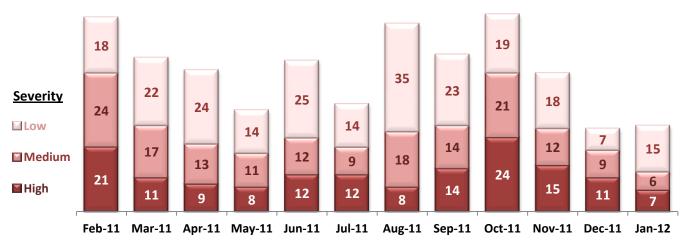

<sup>\*</sup>The total number of patient-involved UIs counts only those incidents that involved at least one or more patients. Some patients may be involved in more than one incident and the number of unique patients does not double count them. The patient UI rate is the number of patient-involved unusual incidents reported for every 1000 inpatient days.

# 8. Selected Types of Incidents

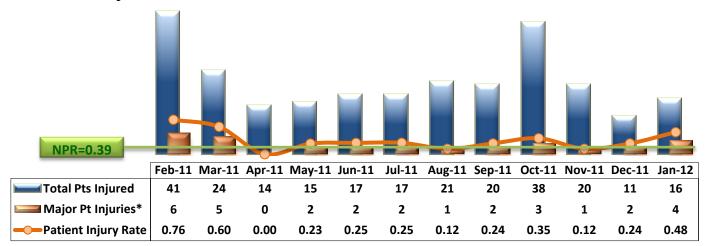

<sup>\*</sup> These are incident types that are frequently reported. Some incidents may be counted in multiple categories. For example, a physical assault incident that accompanied psychiatric emergency and injury is counted under psychiatric emergency and injury as well as under physical assault. Injury is broadly defined to include any type of injuries regardless of the cause or severity level.

# 9. Physical Assaults by Severity

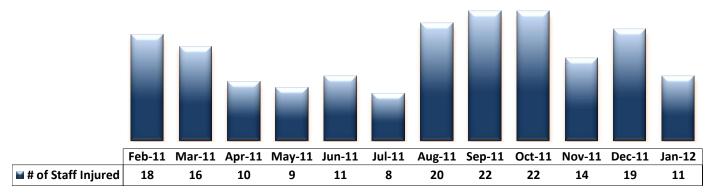

#### 10. Patient Injuries

<sup>\*</sup> Injury is broadly defined to include any type of injuries regardless of the cause or severity level. The total number of patients injured represents all of the reported injuries including minor injuries treated with first aid alone. However, the patient injury rate considers only the number of patient injuries that required beyond first-aid level treatment based on the NRI definition and the patient injury rate is the number of 'major' patient injuries per every 1000 inpatient days

# 11. Staff Injuries

<sup>\*</sup> Injury is broadly defined to include any type of injuries regardless of the cause or severity level. The total number of staff injured represents all of the reported staff injuries including minor injuries treated with first aid alone.

# 12. Elopements

<sup>\*</sup> It counts the total number of unauthorized leaves for any duration that were initiated during month and were recorded in Avatar. The elopement rate is the number of those unauthorized leaves that occurred for every 1000 inpatient days.

## 13. Reported Medication Variances

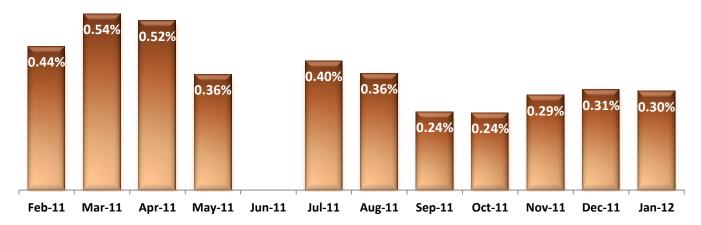

<sup>\*</sup> MV Rate: Number of reported medication variance events that occurred for every 1000 inpatient days.

#### 14. Reported Adverse Drug Reactions

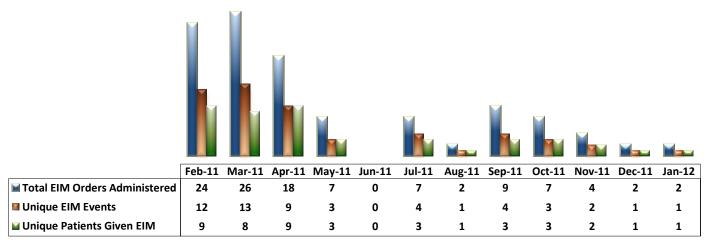

<sup>\*</sup> ADR Rate: Number of reported adverse drug reaction events that occurred for every 1000 inpatient days.

#### 15. Percent of Missing Documentation on Med-Administration

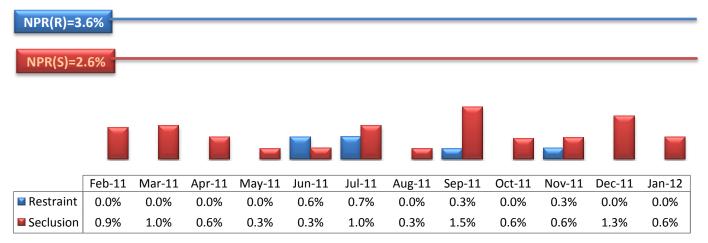

<sup>\*</sup> June-2011 data is not available because of data tracking interruption caused by a technical glitch in Avatar. September-2011 data does not include administration records associated with new orders placed between 9/22/11 and 9/25/11 due to a technical issue that occurred in Avatar and Worx during that time period.

## 16. Emergency Involuntary Medications Documented in eMar

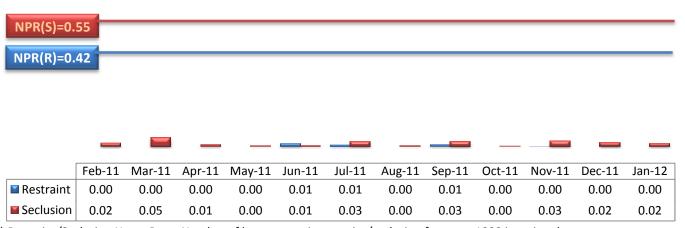

<sup>\*</sup> Some patients may have experienced multiple EIM events during month and some events may have involved multiples doses of medication ordered and administered.

#### 17. Percent of Patients Restrained or Secluded

<sup>\*</sup> Percent of unique patients who were restrained at least once and percent of unique patients who were secluded at least once.

## 18. Restraint Hours Rate & Seclusion Hours Rate

<sup>\*</sup> Restraint/Seclusion Hours Rate: Number of hours spent in restraint/seclusion for every 1000 inpatient hours.

<sup>\*\*</sup> Unusual incident DB suggests that two EIM events occurred in June 2011 while Avatar eMar recorded none.

<sup>\*\*\*</sup> Data prior to October 2011 may include 'now' orders in addition to stat emergency orders.

#### PRISM Data Tables 2012-01.xlsx - Census & AD

<sup>\*\*</sup> Percentage of patients returning within 30 days of discharges that occurred during month

<sup>\*\*\*</sup> Injury is broadly defined to include any type of injuries regardless of the cause or severity level. The total number of patients or staff injured represents all of the reported injuries including minor injuries treated with first aid alone. However, the patient injury rate considers only the number of patient injuries that required beyond first-aid level treatment based on the NRI definition and the patient injury rate is the number of 'major' patient injuries per every 1000 inpatient days. The patient major injury data became available in January 2011.
