- ☐ *Appendix 6) Table – Demographic Information of Individuals in Care*

### Key Trends: Admission, Discharge, Transfer, Census, and Readmissions (1~6)

- The number of admissions and the number of discharges both decreased in March 2016 from February. The number of discharges (35) exceeded that of admissions (30), lowering the average daily census (ADC) to 279 for the month of March from the previous two months (282).
- There was no 30-day readmission from discharges in the month of February 2016, and the 30-day readmission rate for the last 11 months (4.4%), between April 2015 and February 2016, remained below the national average (NPR at 6.9%)<sup>1</sup>. It should be noted, however, that the 30-day readmission rate was low largely because the readmission rate for the pre-discharge trial group was significantly low (1.1%) whereas that for civil and post-trial discharge groups during the same time period was above NPR at 7% and 11%, respectively.
- According to the 180-day readmission rate data for FY15 discharges, which became available as of April 2016<sup>2</sup>, the 180-day readmission rate in FY15, particularly for civil and post-trial population, increased significantly from that of FY14. One out of five civil discharges (20%) and one out of three post-trial discharges (33%) during FY15 returned to the Hospital within 180-days. Both show a noticeable increase from the rates in FY14: 16% and 24%, respectively.

## 1. Admissions to SEH

\* Number of admissions to SEH inpatient program, including transfers from forensic outpatient to inpatient program.

## 2. Discharges from SEH

\* Number of discharges from SEH inpatient program, including transfers from inpatient to forensic outpatient program.

<sup>1</sup> NPR: National Public Rate as of June 2013 was published in November 2013 by National Association of State Mental Health Program Directors Research Institute (NRI), based on data collected from a number of state psychiatric hospitals nationwide.

<sup>2</sup> The rate of those who returned to SEH within 180 days of discharges requires 180-day observation following discharge.

### 3. Average Daily Census

\* Data above is the daily average number of individuals counted at 11:59 PM every day during each month.

### 4. Transfers

\* Number of inter-unit transfers that occurred during month and number of emergency medical leaves that were initiated during month.

### 5. 30-Day Readmission Rate

\* Percent of discharges that returned to SEH within 30 days of discharges. It does not include those who may have been re-hospitalized at another psychiatric facility. This measure requires 30-day observation following discharge.

\*\* The post-trial denominators (discharges) per month range only between one and six, making the monthly re-admission rate high when there is any. For example, in December 2014, there was only one post-trial discharge, which was readmitted within 30 days. Thus, the 30-day readmission rate for post-trial discharge for this month is 100%.

### Key Trends: Unusual Incidents (6~17)

- The frequency of unusual incidents (UIs) tends to mirror the trend in the number of admissions as individuals in early stage of hospitalization are more likely to be involved in unusual incidents than those who have been in care for a longer period of time. As the number of admissions decreased in November and December 2015, the patient UI rates also declined; and the trend of admissions and the patient UI rate in January and February 2016 reversed. In March 2016, however, the patient UI rate (21.3 per 1000 patient days) remained similar to February 2016 (21.7) despite a noticeable decrease of admissions (from 39 to 30).
- In March 2016, the number of violence related incidents remained similar to the level in February. The number of incidents involving physical assaults increased marginally and the number of UIs involving aggressive behaviors with non-physical contact decreased slightly.
- In March 2016, the number patient injuries and staff injuries both decreased.
- The percent of unique individuals restrained significantly increased due to an increase in the frequency of physical holds. However, the overall time spent for restraint decreased noticeably since a physical hold typically lasts shorter than one minute per event. The percentage of individuals secluded and the seclusion hours rate decreased. Both the restraint hours rate (0.011 per 1000 patient hours) and the seclusion hours rate (0.093) continued to be far below the national average (0.71 and 0.44, respectively).
- The patient fall rate in March 2016 (2.84 per 1000 patient days) is lower than that in February 2016 (3.00) as well as the average patient fall rate of FY15 (3.11).
- February and March 2016 each had one elopement.

## 6. Unusual Incidents

## 7. Patient-Involved Unusual Incidents

\* The patient UI rate is the number of patient-involved unusual incidents reported for every 1000 inpatient days.

## 8. Admissions vs. Patient UI Rate

	Apr-15	May-15	Jun-15	Jul-15	Aug-15	Sep-15	Oct-15	Nov-15	Dec-15	Jan-16	Feb-16	Mar-16
—*— Patient UI Rate	22.4	30.7	26.0	26.8	22.2	25.3	28.9	17.9	15.9	19.8	21.7	21.3
—●— Admission	33	42	36	41	38	27	42	28	29	33	39	30

## 9. Unusual Incidents by Severity

	Apr-15	May-15	Jun-15	Jul-15	Aug-15	Sep-15	Oct-15	Nov-15	Dec-15	Jan-16	Feb-16	Mar-16
□ 1) Low	71	97	120	130	115	101	112	104	86	113	110	111
△ 2) Medium	92	108	73	79	65	84	100	31	43	42	52	49
● 3) High	32	69	27	22	22	37	42	20	15	29	25	28
◆ 4) Catstrp	0	0	0	0	0	0	0	0	0	0	0	0
Total UI	195	274	220	231	202	222	254	155	144	184	187	188

## 10. Selected Types of Incidents

	Apr-15	May-15	Jun-15	Jul-15	Aug-15	Sep-15	Oct-15	Nov-15	Dec-15	Jan-16	Feb-16	Mar-16
◆ Aggressive Behavior	59	93	61	83	75	83	103	52	50	67	69	66
● Physical Assault	48	77	49	48	45	62	74	46	38	46	43	44
* Psych Emerg.	64	96	25	39	28	59	55	22	7	19	20	19
■ Fall	18	32	28	31	33	23	25	25	22	26	24	24
▲ Injury	32	50	24	36	31	39	45	23	14	31	34	24

\* These are incident types that are frequently reported. Some incidents may be counted in multiple categories. For example, a physical assault incident that accompanied psychiatric emergency and injury is counted under psychiatric emergency and injury as well as under physical assault. Injury is broadly defined to include any type of injuries regardless of the cause or severity level.

## 11. Physical Assaults by Severity

\* Any physical assault that accompanies a code 13 or results in extensive injury needing off-unit treatment or transfer to ER is considered to be high severity; any physical assault that causes a minor injury that can be treated on unit is considered to be medium severity; and physical assault events that result in no injury are considered to be low severity.

## 12. Patient Injuries

	Apr-15	May-15	Jun-15	Jul-15	Aug-15	Sep-15	Oct-15	Nov-15	Dec-15	Jan-16	Feb-16	Mar-16
Total Pts Injured	19	29	17	26	20	32	34	13	9	24	23	12
Major Pt Injuries*	1	3	1	1	3	3	1	3	1	0	1	2
Patient Injury Rate	0.12	0.36	0.13	0.12	0.36	0.37	0.12	0.36	0.12	0.00	0.12	0.24

\* Injury is broadly defined to include any type of injuries regardless of the cause or severity level. The total number of patients injured represents all of the reported injuries including minor injuries treated with first aid alone. However, the patient injury rate considers only the number of patient injuries that required beyond first-aid level treatment based on the NRI definition and the patient injury rate is the number of 'major' patient injuries per every 1000 inpatient days

## 13. Staff Injuries

\* Injury is broadly defined to include any type of injuries regardless of the cause or severity level. The total number of staff injured represents all of the reported staff injuries including minor injuries treated with first aid alone.

## 14. Patient and Staff Falls

	Apr-15	May-15	Jun-15	Jul-15	Aug-15	Sep-15	Oct-15	Nov-15	Dec-15	Jan-16	Feb-16	Mar-16
Total Staff who Fell	2	5	3	1	2	2	4	0	3	0	4	2
Total Patients who Fell	16	29	25	30	32	22	26	25	20	27	24	24
Patient Fall Rate	1.98	3.47	3.15	3.64	3.79	2.71	3.08	3.02	2.34	3.14	3.00	2.84

\* The patient fall rate is the number of patient falls per every 1000 inpatient days.

## 15. Percent of Patients Restrained or Secluded

	Apr-15	May-15	Jun-15	Jul-15	Aug-15	Sep-15	Oct-15	Nov-15	Dec-15	Jan-16	Feb-16	Mar-16
Restraint	7.5%	10.2%	8.2%	6.9%	5.8%	7.9%	10.9%	5.6%	6.2%	7.7%	8.1%	11.6%
Seclusion	2.9%	3.5%	3.3%	2.0%	4.8%	4.3%	5.1%	4.0%	3.2%	5.1%	4.1%	3.5%

\* Percent of unique patients who were restrained at least once and percent of unique patients who were secluded at least once. The denominator includes all individuals who were served in care  $\geq 1$  day during month.

\*\* Prior to April 2015, the Hospital tracked only mechanical restraint events, but the Hospital's restraint policy has changed to include any physical holds. The sudden increase of the restraint data as of April 2015 reflects this change.

## 16. Restraint Hours Rate & Seclusion Hours Rate

	Apr-15	May-15	Jun-15	Jul-15	Aug-15	Sep-15	Oct-15	Nov-15	Dec-15	Jan-16	Feb-16	Mar-16
Restraint	0.031	0.098	0.074	0.163	0.008	0.031	0.086	0.052	0.032	0.038	0.123	0.011
Seclusion	0.043	0.060	0.150	0.067	0.062	0.260	0.281	0.043	0.047	0.099	0.136	0.093

\* Restraint/Seclusion Hours Rate: Number of hours spent in restraint/seclusion for every 1000 inpatient hours.

\*\* The duration of each physical hold event is counted as 1 minute as a physical hold is ordered and used only as a temporary intervention that lasts less than a minute to break up any physical conflicts or to administer emergency medications.

## 17. Elopements

\* Data herein counts the number of unauthorized leaves for any duration that were initiated during month and were recorded in Avatar. The elopement rate is the number of those unauthorized leaves that occurred for every 1000 inpatient days.

### Key Trends: Medication Documentation, MV, ADR, and STAT (18~22)

- The monthly number of reported Medication Variances (MV) in the last three months has been approximately around 15.
- No Adverse Drug Reaction (ADR) was reported in February and March 2016.
- The rate of missing documentation by nursing staff on medication administration (0.49%) decreased slightly in March 2016, from 0.52% in February.
- The number of STAT (emergency medication) events in March 2016 (52) is lower than that of the previous month (71) and so is the number of unique individuals involved in one or more STAT events (29 in March compared with 37 in February).

## 18. Reported Medication Variance Events

\* MV Rate: Number of reported medication variance events that occurred for every 1000 inpatient days.

## 19. Reported Adverse Drug Reactions

\* ADR Rate: Number of reported adverse drug reaction events that occurred for every 1000 inpatient days.

## 20. Percent of Missing Documentation on Med-Administration

## 21. Medication Refusal Rate\*

\* Medication Refusal Rate: the number of refused medication doses divided by the total number of doses scheduled for administration.

## 22. Number of STAT Events and Individuals Involved

### Key Trends: Environment of Care (23)

- The 3 day completion rate of the SiteFM work orders increased to 75% during the first quarter of FY16 from the average in FY15 (68%). However, the rate declined noticeably in the second quarter of FY16: 67% in January 2016, 53% in February, and 62% in March 2016.
- In the month of February 2016, the Hospital received a total of 982 SiteFM work orders (or 34 per day), which was not only a significant increase from the previous months but the highest level since PRISM began to report this data first time for January 2014. The number of SiteFM work orders in March 2016 declined to 900 (or 29 per day) but is still far above the average number of work orders in FY15 (24 per day).

## 23. Percentage of SiteFM Work Orders Completed within 3 Days

### Key Trends: Demographics, Legal Status, and Length of Stay (24-25)

- The proportion of female individuals remaining in the Hospital's care remained in the range of 30% to 33% throughout FY15 and in the first half of FY16.
- The percentage of individuals aged 60 years or older remaining in care increase gradually throughout FY15 and continued to remain above 40% during the first half of FY16. The percentage of those under 30 years also increased in FY15 and remained around 15% in FY16. The recent increase in younger population may be due in part to an increase of pre-trial admissions, which tend to include more younger individuals.
- The proportion of pre-trial population consistently increased in the last 12 months: as of March 31, 2016, 28% of individuals remaining in care were pre-trial population while the same group composed 21% on April 30, 2015.
- The median Length of Stay (LOS) for the overall population in care increased in the last 12 months with the exception of a couple of months. Particularly, the median LOS for civil population increased to 604 days (20 months) as of March 31, 2016 from 388 days on April 30, 2015. The median LOS for post-trial population on March 31, 2016 is 4293 days (11 years and nine months) whereas that on April 30, 2015 was 4062 days (11 years and one month).

## 24. Demographics

### Trend of Gender Distribution

### Trend of Age Distribution

**Trend of Legal Status Distribution**

## 25. Length of Stay

**Average and Median Length of Stay for Individuals in Care**

\* National Public Rate, NASMHPD Research Institute, National Research Institute (NRI), Data as of June 2013, Published in November 2013.

\*\* Numbers may change if any additional UI report is made after the data run date from UI database (around the 15th of the following month); According to the revised UI policy as of November 4, 2013, a medication variance (MV) incident became no longer considered to be an unusual incident, and a medication or vital sign refusal incident is not longer an UI as of May 2014. UI data for the past 12 months in this report has been updated to reflect this change and reanalyzed in order to show the UI trend in consistent logic.

\*\*\* Injury is broadly defined to include any type of injuries regardless of the cause or severity level. The total number of patients injured represents all of the reported injuries including minor injuries treated with first aid alone. However, the patient injury rate considers only the number of patient injuries that required beyond first-aid level treatment based on the NRI definition and the patient injury rate is the number of 'major' patient injuries per every 1000 inpatient days

\*\*\*\* One STAT event may involve more than one STAT order for the same patient. Any orders placed within 20 minute timeframe are considered to belong to one STAT event.

\* National Public Rate, NASMHPD Research Institute, National Research Institute (NRI), Data as of June 2013, Published in November 2013.

\*\* Restraint data prior to April 2015 includes only mechanical restraints. The Hospital's restraint policy has been revised to consider a physical hold a restraint and data as of April 2015 reflects this change. The duration of each physical hold event is counted as one (1) minute as a physical hold is ordered/used only as a temporary intervention that lasts less than a minute to break up any physical altercations or to administer emergency medications.
