

**Department of Behavioral Health
Peer Specialist Certification Training Program
Application
2023**

Thank you for your interest in the Department of Behavioral Health Peer Specialist Certification Training Program!

Peer specialists are self-identified people who are successful in the recovery process and who help others who are living with mental and/or substance use disorders. Through mutual respect and shared understanding based on similar experiences, peer specialists help people get into treatment and meet the challenges to sustain recovery.

The Peer Specialist Certification Training Program builds on the experience of people in recovery with training in foundational competencies required by anyone who provides peer support in behavioral health services. The Peer Specialist certification training program will reinforce your knowledge based on personal experience, bring a unique perspective to person centered care, and enrich our recovery support services. The Peer Specialist Certification Training Program helps prepare individuals to qualify for available certified peer specialist jobs within the behavioral health provider network.

A certified Peer Specialist offers critical support in a variety of ways including

- Acting as a mentor and being present for those engaged in the recovery process
- Helping people advocate for and access resources they need to support their recovery
- Participating in the treatment team under the supervision of a trained behavioral health specialist
- Leading recovery groups
- Conducting surveys to gauge satisfaction with services
- Bringing their personal experiences to decisions about program and policy development
- Participating in community engagement activities to promote treatment and support services

Peer certification training classes will be held February 13, 2023, March 27, 2023 and June 5, 2023. Application deadlines are listed on page three (3). Selected applicants will be notified of acceptance. Classes will be conducted in person at 64 New York Avenue, NE, Room 284E. Class size will be limited to no more than 15 participants to allow social distancing guidelines to be followed. During the classes, DC Health and CDC guidelines will be followed.

After successful completion of classroom training, an 80-hour field practicum must be completed with a behavioral health provider certified by the Department of Behavioral Health. Participants who successfully complete program requirements will receive proof of program completion.
